

BARBECUE LODGES

Outdoor Scandinavian Luxury

THE FOX BAR: 13M2 Floor Plans

- It is essential that you provide a suitable base structure for your lodge of the correct size and shape. BBQ Lodges offer a comprehensive base service so please ask for more details
- A Base Pack can be downloaded from our website. A pegged or wooden base is ideal and will suit most gardens/sites provided the area is reasonably flat and level. Our home site survey will assist with base suitability.

Customers can choose to provide their own base (including concrete) but ALL bases must be the exact shape and size as the solid line shown in the drawing. If opting for concrete, please measure to the interior of the shuttering – detailed instructions on how to make a concrete base are available upon request. A decked base can be larger but do leave a gap between the boards to let water drain away

- The dotted line in the drawing shows the overhang of the roof pelmets – please allow for this when measuring up the space for the position of your Lodge

- Our Base Pack gives lots of information on base options but please feel free to contact us for further instructions and drawings
- Photos and further advice is always available from Barbecue lodges to ensure that you get the base correct, please contact us if you need more information.
